Training Program Information

Network Security Administrator

The EC-Council's ENSA certification looks at the network security in defensive view while the CEH certification program looks at the security in offensive mode. The ENSA program is designed to provide fundamental skills needed to analyze the internal and external security threats against a network, and to develop security policies that will protect an organization's information. Students will learn how to evaluate network and Internet security issues and design, and how to implement successful security policies and firewall strategies. In addition, they will learn how to expose system and network vulnerabilities and defend against them.

Benefits

- ENSA is for experienced hands in the industry and is backed by a curriculum designed by the best in the field.
- Network Security Administrator course (ENSA) was certified for meeting the 4011 training standard for information security professionals.
- Greater industry acceptance as seasoned Network Security professional.
- Learn to configure firewalls, intrusion detection systems and AV systems.
- Develop effective security policy in the company.
